MM-122A

Portable Weld Checker

- Proven weld checker designed to monitor weld currents
- Measures single-phase AC, DC inverter, AC inverter, Capacitor Discharge, Transistor, Single-phase rectified, Three-phase rectified and Three-phase low frequency efficiently
- Compact design which allows flexible mounting on the welding machine.
- Easy operation: Turn the dial to scroll and move a cursor. Press the dial to select.
- Measures time in ms and cycle.
- Memory and output: Measured data can be sent to and criteria can be changed at a PC
- Measured data can be printed out to a dedicated printer

CONFIGURATION OPTIONS

A dedicated printer like BL2-58PN-MYT can print out measured data and waveform. The external datacom function can receive and measure voltage signals even from other sensors (+/- 10 V at max.). Amada Miyachi Europe offers a variety of coils upon request such as MB-400K.

The MM-122A is designed to monitor and measure various kinds of weld currents with a compact and easy to use unit in various industries such as Automotive, Electronics, Batteries, Solar Energy, Medical, and Aerospace.
