BOX-03 - Pallet with wooden cage

Machine fixed onto a pallet with an open wooden structure around it, designed to provide mechanical protection, allow visual inspection and facilitate handling by forklift or pallet truck.

Recommended application

- Medium and large equipment.
 - International transport.
 - Machines requiring quick visual inspection.
 - Shipments with moderate risk of side contact or multiple handling.
-

Packaging components

- ISPM-15 treated pallet base.
- Open wooden frame.
- Cross members and diagonal reinforcements.
- Straps and internal fixings.
- Handling and centre-of-gravity labels when applicable.

Main advantages

- Good mechanical protection.
 - Moderate cost compared with a closed crate.
 - Allows visual customs inspection.
 - Reinforced structure for multimodal transport..
-

Limitations

- Does not fully protect against dust, rain or humidity.
 - May require an inner barrier bag for sea or humid destinations.
 - Does not provide full content privacy.
-
