# BOX-04 - Closed wooden crate

Machine fixed onto a pallet-type base and enclosed inside a fully closed wooden crate, manufactured with plywood panels and removable structural reinforcements.

---

## Recommended application

- Worldwide export.
  - High-value equipment.
  - Multimodal transport.
  - Shipments with high risk of handling, dirt or impact.
- 

## Packaging components

- Integrated ISPM-15 treated pallet base.
- Wood or plywood panels.
- Vertical and horizontal reinforcements.
- Removable screws and fasteners.
- Internal protections, foam and straps.
- External handling markings.

## Main advantages

- Maximum mechanical protection.
  - Protection against dirt, dust and accidental contact.
  - Stacking capability when the crate is designed for it.
  - Professional export appearance.
- 

## Limitations

- Higher cost.
  - Greater weight and volume.
  - Requires more manufacturing and preparation time.
  - May require an additional vacuum bag for long sea transport.
-
