BOX-05 - Cardboard box on pallet

Machine or modular kit protected with a reinforced industrial cardboard box, placed on a pallet and stabilised with straps, internal foams and corner protectors.

Recommended application

- BASIC range.
 - Disassembled modular equipment.
 - Express transport.
 - Low-weight or optimised-volume shipments.
-

Packaging components

- Base pallet.
- Double-wall or triple-wall cardboard box.
- Internal foams or separators.
- Corner protectors.
- Straps and external film.
- Transport and orientation labels.

Main advantages

- Very cost-effective.
 - Reduced weight.
 - Easy to recycle.
 - Suitable for modular kit-type models.
 - Fast assembly and preparation.
-

Limitations

- Limited protection against humidity.
 - Lower resistance to impacts and punctures than wood.
 - Not recommended for heavy equipment without additional reinforcement.
-
