BOX-06 - Cardboard box + vacuum bag

Reinforced industrial cardboard box with internal barrier bag, vacuum-sealed or heat-sealed, including desiccants to protect sensitive equipment against humidity and corrosion.

Recommended application

- Sea freight for BASIC equipment.
 - Sensitive electronic equipment.
 - Shipments requiring low weight and anti-corrosion protection.
 - Cost-effective export with humidity control.
-

Packaging components

- Base pallet.
- Multi-layer aluminium barrier bag or VCI bag.
- Desiccants and humidity indicator.
- Reinforced cardboard box.
- Internal foams, straps and external film.

Main advantages

- Anti-corrosion protection.
 - Protection against humidity.
 - Lower cost than wooden crate with vacuum protection.
 - Lower weight compared with wooden packaging.
-

Limitations

- Lower mechanical protection than a wooden crate.
 - Requires control of bag sealing quality.
 - Not recommended for very heavy equipment or complex geometry without reinforcements.
-
