R&D Services

Incorporatechno – Industrial Innovation Partner

The Group offers a comprehensive Research, Development and Innovation (R&D&I) service aimed at supporting our clients in the development, validation, and industrialization of new technologies, processes, and products.

Our approach combines expertise in engineering, microelectronics, software, testing, and industrial validation, supported by a multidisciplinary internal structure and a public funding ecosystem.

Objective: Reduce technological risk, accelerate time-to-market, and ensure the industrial feasibility of the developed solutions.

- ✓ Strategic technology partner
- ✓ Integrator of hardware + software + processes + AI
- ✓ Industrial validation center (Smart Demo Center)
- ✓ Innovation platform focused on production environments

We are not a theoretical laboratory — we deliver executable industrial R&D.

The service can be structured as:

- Fixed-scope project (with defined milestones)
- Flexible hour-based service package
- Multi-year R&D program
- Co-financing through public funding schemes

Possibility of significantly reducing the client's costs through grants and subsidies.

R&D Services

- ✓ Reduction of technological risk
- ✓ Validation before investment (CAPEX)
- ✓ Acceleration of time-to-market
- ✓ Access to advanced technologies
- ✓ Improved competitiveness
- ✓ Direct transfer to production

The Group's experience and capabilities combine: Industrial engineering, test engineering, applied microelectronics, industrial software & AI, Smart Demo Center, and expertise in complete production lines.

We are unique in the market: "Developing, validating, and industrializing new technologies with a single partner, reducing risk, cost, and time."
