Enterprise Package

Deployment at Scale with Governance

To guarantee an industrial deployment that is scalable, controlled, and aligned across multiple plants or production lines.

Target

- Large factories
 - Multi-site environments
 - EMS / large industrial groups
-

Includes

- Enterprise architecture and deployment design
 - Coordinated rollout across multiple lines and sites
 - Advanced security and data governance
 - Executive KPI setup and analytics
 - Advanced enablement (e.g. FMEA supported by AI) + dedicated consultant
-

Approach

Scalability / standardization / governance

Structured service packages designed to support the customer at every stage of implementation, from initial deployment to enterprise rollout.

Benefits

- Accelerated go-live
 - Reduced implementation risks
 - Ensured user adoption
 - Structured scalability
-

Scope

- Industrial software implementations
 - Pilot projects
 - Multi-line / multi-site deployments
 - Industrial digital transformation programs
-

Structured in Three Levels

- Essential
 - Advanced
 - Enterprise
-

Common Methodology

Kick-off

Definition of objectives

Scope of the package

Implementation

Configuration and integration

Validation

Go-live and stabilization

Adoption

Training and real usage

Evolution

Scale-up to next level

SOFT DEMOCENTER - Carrer de la Masia en Notari, 4. 08800 Vilanova i la Geltrú, Barcelona, Spain

Common Methodology

1. Kick-off

- Definition of objectives
- Scope of the package

2. Implementation

- Configuration and integration

3. Validation

- Go-live and stabilization

4. Adoption

- Training and real usage

5. Evolution

- Scale-up to next level
